More items will be added later in the season, from seed sources and from new material obtained in trade. Additionally, certain species like Prostantheras, Westringias, S. regla and S. sessei require warmer conditions to root cuttings.

Plants are \$3.50 each for 2.5 inch pots, \$4.25 each for 3 inch pots, and \$5.00 each for 3.5 inch pots. Most plants are in the smaller size. Expect a price jump soon, since most of my expenses (from supplies to greenhouse plastic to fuel for heating and transportation) is either petroleum or natural gas based.

Shipping cost will be based on previous orders of about the same size to the same area and shipped by the same method. (USPS Priority mail vs. either 2-day or 3-day air UPS or Fed Ex). For USPS Priority, this is around 20 - 25% of the cost of the order
